Nairobi, Kenya

Summary

Frontend-focused software engineer with 6+ years of experience building scalable React applications and production-grade full-stack systems. Shipped 100+ production features across consumer, payments, and web3 platforms with a strong focus on performance, maintainability, and user experience.

Experience

Senior React Frontend Engineer

Rainforest Alliance • Nairobi, Kenya

10/2025 - Present

- Architected and shipped 20+ production-grade frontend features focused on consumer data collection, platform scalability, and long-term maintainability.
- Resolved 15+ high-impact production issues across critical application workflows, improving platform stability, performance, and user experience.
- Designed and maintained an internal NPM-based design system adopted across teams to standardize UI architecture, accelerate development, and improve consistency.
- Partnered closely with product and design stakeholders to refine user flows, improve accessibility compliance, and drive UX-focused frontend decisions.
- Contributed to frontend hiring initiatives by defining technical role requirements and developing engineering assessment exercises for candidate evaluation.

Full Stack Software Engineer

GasHawk • EMEA, remote

04/2024 - 08/2025

- Led the rebuild and redesign of the core web application using React and TypeScript, improving platform reliability, reducing load times, and delivering a more scalable user experience.
- Implemented secure authentication flows and optimized REST API integrations, reducing latency and resolving recurring timeout and stability issues.
- Engineered multi-chain interoperability and a quota-based plan system, enabling seamless support for multiple EVM-compatible networks and scalable account management.
- Enhanced the Framer-powered marketing platform by streamlining the gas savings checker experience, improving developer engagement, product discoverability, and conversion flow efficiency.

Full Stack Software Engineer

IOTA • Nairobi, Kenya

11/2023 - 04/2024

- Built backend systems to automate the exchange of SPS documents between IOTA and partners, reducing manual steps and improving process reliability.
- Revamped the TLIP web app frontend with React and TypeScript, enhancing usability and delivering a smoother, more responsive user experience.

Full Stack Software Engineer

Syndicate • EMEA, remote

04/2021 - 03/2023

- Built and deployed a production-ready Web3 dApp in under 3 months (TypeScript, React, Ethereum/Polygon), accelerating Syndicate's go-to market timeline.
- Launched Collectives, enabling NFT-based communities to organize around generative art and driving early engagement among creators and collectors.

- Designed and delivered a GraphQL backend for storing off-chain data in just one month, improving data accessibility and reducing integration complexity.
- Increased smart contract reliability by implementing a comprehensive automated testing suite, reducing the risk of regressions and strengthening security.

Frontend Engineer

Cellulant • Nairobi, Kenya

11/2019 - 03/2021

- Improved accessibility and usability of payment apps by redesigning flows in React/Next.js.
- Optimized the checkout UX across 6+ payment options, resulting in smoother transaction completion.

Full-Stack Software Engineer

Andela Kenya Ltd • Nairobi, Kenya

11/2018 - 09/2019

- Delivered multiple front-end applications with ReactJS on tight sprint cycles, enabling faster product iterations and improving user experience.
- Developed and deployed a REST API with Python/Django that supported scalable data handling and reduced backend response times under production load.

Team Leader

Sama • Nairobi, Kenya

06/2016 - 11/2018

- Led a 22-person team in executing a large-scale web crawling project for Glassdoor.
- Coordinated workflows, evaluated team performance, and delivered constructive feedback that improved accuracy and efficiency.

Quality Analyst

Sama • Nairobi, Kenya

11/2015 - 05/2016

- Improved quality across multiple work streams by analyzing compliance gaps and recommending corrective actions.
- Boosted agent performance by assessing transactions, giving feedback, and driving measurable quality gains.
- Delivered clear quality reports to managers and stakeholders, ensuring consistent performance standards.

Agent Junior Developer

Sama • Nairobi, Kenya

07/2015 - 11/2015

- Optimized job feed integrations with HTML, CSS, XPath, and regex.
- Streamlined error handling by resolving issues and improving data quality.
- Ensured accuracy at scale by verifying data and removing duplication.

Skills

Frontend:

React, Next.js, TypeScript, JavaScript (ES6+), Redux, Zustand, TailwindCSS, Styled Components, Tanstack Query, Tanstack Router

Backend & APIs:

Node.js, Fastify, Express.js, REST APIs, GraphQL, WebSockets

Databases & Infrastructure:

PostgreSQL, Redis, Firebase, Docker, Vercel, Azure DevOps, CI/CD Pipelines

Testing & Tooling:

Vitest, React Testing Library, Playwright, Jest, Git, GitHub Actions

Web3:

Ethereum, Polygon, wagmi, ethers.js, smart contract integrations

Architecture & Practices:

Design Systems, Accessibility (WCAG), Frontend Performance Optimization, Responsive Design, Agile/Scrum
